Precision ground thread form with sintered Chip-Breaker

Carmex expands the Type B line by offering a new size 11mm internal thread turning inserts, including a wide range of thread profiles and pitches

Precision Ground Profile

Ensures accurate and high quality threads

- Suitable for most common materials.
- Reduces cutting forces.

Sintered Chip-Breaker

- Improved chip control and chip flow, for high surface finish.
- Excellent for internal threads.

Grade and Coating

- BMA Sub-Micrograin grade (K20-K30, P20-P40).
- Advance PVD coating, provides high wear and heat resistance.
- To use with a wide range of materials.

To be used with Carmex standard toolholders
